KING KONG

ISLAND

7th Scenario

You are with a group of Hollywood filmmakers, who want to make a movie about a large ape who lives on an unexplored island. Unfortunately, this task turned out to be much more difficult than originally thought, and members of the film crew begin to die. Can you protect the crew, film the beast, and escape the island alive? Let the horror begin..

Setup changes

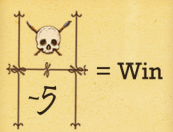

Start with a Shelter (no ). Soldier character may be used even in 1 or 2 player games.

Adjusting the scenario

If you think this scenario is too easy add the following rule: during Night phase when at least one player doesn't eat one film-maker dies. Actress doesn't die, she goes away and you have to find her like if she were captured by King Kong.

Goal of the scenario

Build 3 Traps to ensnare King Kong, capture him using a special Hunting action, and ensure the actress and director escape the island unharmed. Each Trap must be built on a different land tile with . Traps may be constructed on Camp tiles, adjacent tiles, or tiles located 2 spaces away from camp, using same construction rules as in the base game. Special Hunting action requires 2  and reduces  by 5.

Totems

Each  on a land tile represents a lair of King Kong. When a  is discovered place a   in the Weather space of game board. During the Weather phase roll a  for each number in Weather space.

Special rules

When the  reduces Palisades below zero the following occurs: each player loses   and a member of the film crew is killed by King Kong (starting with light operator and moving right towards director). When a member of the film crew is killed place a  in  next to individual. Note: the actress is not killed by King Kong, but is instead taken captive. Players must rescue actress by uncovering a 4th land tile with  on it and conducting a special Exploration action, where the players must combat the next  in the Mystery deck. If you spend the Night on a tile with  next round during Production phase each player gets .
